

convert the .RPM files into .DEB files

```
sudo alien -d *.rpm  
Explore filesystem
```

```
gksu nautilus  
Removing dot files from home
```

```
cd && rm -fr .gconf .gconfd .gnome2 .gnome2_private .kde .local .config
```

command for finding file size larger than 100mb

```
sudo find / -type f -size +100000k -exec ls -lh {} \; | awk '{ print $8 ": " $5 }'
```

To install packages from the dvd you should be able to open a terminal and type

```
sudo apt-cdrom add  
sudo apt-get update  
sudo apt-get install packagename  
sudo apt-get update
```
